### **AMBIGEST**

The project AMBIGEST is placed in the announcement of grants for projects with a supraregional nature from the Innoempresa Program 2007 of DPYME (General Management of Small and Medium-Sized Enterprise Policies, MIT and C).

AMBIGEST is an application software designed by CTM Technological Center by means of which the business will be able to collect, organise and control all the data, documents and activities of a system of environmental management. The contents of this application software will be certified with regard to the fulfilment of the requirements of the regulation UNE-EN-ISO 14001:2004 by the reputable firm TÜV INTERNACIONAL.

The project foresees the participation of around 25 business pertaining to three Autonomous regions (Catalunya, Galicia and València). The project is multisectorial, in other words, it is addressed to any kind of enterprise wanting to implant in their organisation a system of environmental management easily and quickly.

If your enterprise is interested in participating in the project and in acquiring this application software for the implantation of a system of environmental management you only have to contact us and we will give you further details.

### **Conference: “Management of wastes as byproducts. Practical cases”**

L'Agència de Residus de Catalunya (Agency for Wastes in Catalonia) organises on April 24th in the “Salón de los Cónsules” of the “Casa Llotja del Mar” in Barcelona (Passeig d'Isabel II, 1), a conference on management of wastes as byproducts in which practical cases in different spheres and sectors will be presented. The conference will include two blocks:

- Block 1: Management of wastes as byproducts/practical cases
- Block 2: The Catalanian byproducts market / practical cases
